NEW JERSEY APPLE INSTITUTE  
APPLE TREES FOR FALL 1952 PLANTING

The supply of apple trees available through the Apple Institute for Fall 1952 planting is limited to a relatively small number of trees of five varieties, namely, N. J. #1, N. J. #2, Oregon Scarlet Stayman, Turley and Yellow Delicious.

Because of the small number of trees for sale by the Apple Institute this fall no catalog will be published. If you are interested in planting any trees this fall of the varieties listed above, place your order immediately with the C. H. Steelman Fruit Nursery, R. D. #3, Princeton, telephone Princeton 1-2525.

The prices are the same as last year which were as follows:

Grade	1 to 9 trees	10 to 49 trees	50 to 99 trees	100 to 499 trees	500 or more trees
3 to 7 feet	-	\$1.50	\$1.25	\$1.10	\$1.00
5 to 7 feet	\$2.00	-	-	-	-

Trees of the following varieties on Hibernial rootstocks will be available through the Apple Institute for Fall 1953 planting:

N. J. #1	Opalescent	Starr
N. J. #2	Oregon Scarlet Stayman	Turley
N. J. #3	Rome	Twenty Ounce
N. J. #4	Red Rome (Applegate)	Lobo
Double Red Delicious	Red Rome (Smith)	McIntosh
	Yellow Delicious	

If you are interested in planting trees of any of the above varieties next fall (1953) it is suggested that you place your order in advance. No great change in price is anticipated.

Arthur J. Farley  
Secretary

# THE UNITED STATES DEPARTMENT OF AGRICULTURE

WASHINGTON, D. C. 20250

The supply of apples for the 1953-54 season is estimated to be about 1.5 billion bushels, or about 10% more than the 1952-53 season. This increase is due to a combination of factors, including a larger acreage of apple orchards and a higher yield per acre. The following table shows the estimated supply of apples for the 1953-54 season, by variety and grade.

Because of the large number of apples produced in the United States, it is not possible to grade all of the apples. The following table shows the estimated supply of apples for the 1953-54 season, by variety and grade. The grades are based on the size and quality of the apples. The following table shows the estimated supply of apples for the 1953-54 season, by variety and grade.

The prices are for the apples in the following table, by variety and grade.

Grade	1 to 2	3 to 4	5 to 6	7 to 8	9 to 10
1 to 2	1.00	1.00	1.00	1.00	1.00
3 to 4	1.00	1.00	1.00	1.00	1.00
5 to 6	1.00	1.00	1.00	1.00	1.00
7 to 8	1.00	1.00	1.00	1.00	1.00
9 to 10	1.00	1.00	1.00	1.00	1.00

These are the estimated prices for the apples in the following table, by variety and grade. The prices are for the apples in the following table, by variety and grade.

Yellow Delicious	1.00
Red Delicious	1.00
Golden Delicious	1.00
Granny Smith	1.00
Jonathon	1.00
Empire	1.00
Macintosh	1.00
Orin	1.00
Winesap	1.00
Other varieties	1.00

If you are interested in planting trees of any of the above varieties, please contact your local nursery or the United States Department of Agriculture. This is a suggestion that you place your order in the month of May. No great change in price is anticipated.

Respectfully,  
Secretary
